

Extension/Replacement Hose

Siphon King® Extension/Replacement Hose

Catalog #	Size	Selling Unit
48272	72" Extension/Replacement Hose	6 per box

Installation Instructions:

1. For replacement, screw the open end of hose (the end without the coupler) into pump outlet fitting.

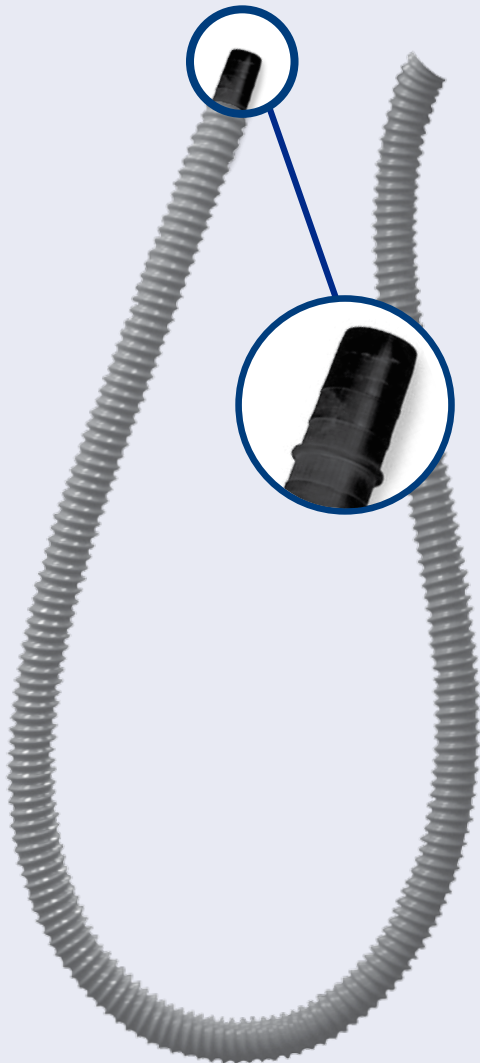

2. Coupler is included to extend the hose length.

3. To extend hose, firmly screw coupler clockwise into the end of the existing hose on the pump.

4. Continue to screw both hoses together until they meet the coupler's center.

Warning:
Do not insert coupler into pump outlet fitting.

Siphon King® Extension/Replacement Hose

Features and Benefits

- Easy to attach to Siphon King Utility Pumps
- 72" flexible hose directs water away from work site
- Additional length is perfect for irrigation valve boxes, meter pits, pipe trenches, and anywhere water accumulates
- Coupler provides hose extension to existing pump hose
- Do not insert coupler into pump outlet fitting

IMPORTANT

- Disconnect power before placing pump into water
- Flush pump with clean water following use in excessive sandy conditions
