

BLACK SERIES CONNECTORS

DID YOU KNOW THAT THE BLACK SERIES:

Are the ORIGINAL waterproof connectors?

That's right, the very first. King Innovation's Black Series Waterproof Connectors were the first of their kind, and from innovation has come a standard for waterproof irrigation connectors.

Are trademarked?

Using a black connector? Yep, you're using King. King Innovation has successfully trademarked the black color for waterproof wire connectors, so when you use black it means King... which means quality with each connection.

Eliminates the need for multi-step products?

DryConn Black Series Connectors are one-step connectors, so no pre-twisting of wires is required. One-step is all it takes for a secure waterproof connection.

Are the perfect choice for landscape lighting?

UL 486D Listed and suitable for use in UL 1838 low voltage landscape lighting systems, DryConn Black Series wire connectors are the number one choice for landscape lighting installations.

Cover a large range of wire combinations?

DryConn Black/White, Black/Gray and Black/Blue all make up the Black Series of waterproof connectors. Together, the three cover a variety of UL approved combinations between #22-#6 AWG.
