

DBG DIRECT BURY WITH SMARTGEL

DID YOU KNOW THAT DBG WITH SMARTGEL:

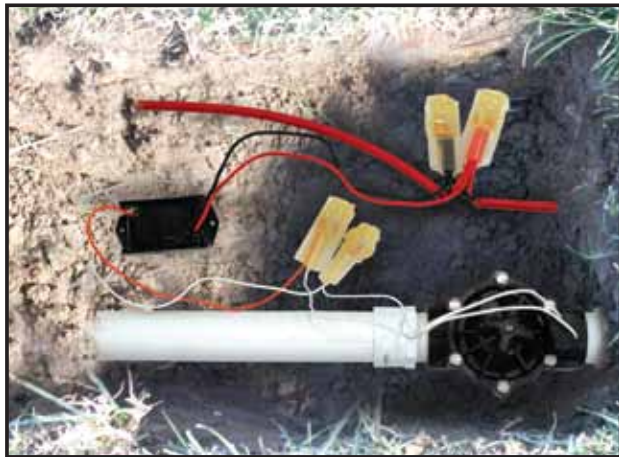

Is the best choice for two-wire irrigation systems?
King's DBG with SmartGel is the perfect solution for connections in two-wire/decoder irrigation systems. Waterproof and corrosion proof, it is also manufacturer approved for direct bury.

Is semi-transparent?
The DBG is pre-filled with a semi-transparent SmartGel. This allows for splice examination during and after installation without opening the encapsulated connector.

Eliminates mess?
This revolutionary item eliminates the need for messy items such as grease tubes, heat shrinks, primers, tapes and epoxy packs.

Is a patented connector?
Now patented, you won't find another one like it. The DryConn DBG with SmartGel is a one of a kind connector with a design you will know is from King.

Is available with three different connectors?
The DBG with SmartGel fits individual preferences and applications by offering a version with a twist-on nut connector, a push-in connector, or a split-bolt connector.
