

DBSR BLACK CONNECTORS

SMALL

MINI

MEDIUM

LARGE

DID YOU KNOW THAT DBSR BLACK:

Are a two for one deal?

One piece, two solutions... the DBSR is a twist on connector and a strain relief tube all in one. Just twist on your DBSR connector and close the lid.

Have four members in their little family unit?

DBSR Large, Medium, Small and Mini makes four in the family! Together these connectors cover a variety of wire combinations between #22 - #6 AWG.

Wear their sunscreen?

These connectors have UV protection to protect splices against harsh sunlight when outdoors. Does your connector do that?

Are pre-filled for even greater protection?

DryConn DBSR Black Large, Small and Mini are pre-filled with petroleum grease. The Medium is filled with dielectric silicone sealant. Both fillers never harden, and really protect splices.

Protect against loose connections?

Each DBSR Connector comes equipped with a tube. When wires are pulled, the tube takes the heat, leaving the splices comfortable and functional. Yeah, this connector is pretty cool.
