

4-WAY CRIMP TOOL

Designed for even compression and reliable connections.

Instructions for use:

1. Set the latch to position
"A" for small crimp sleeves or
"B" for large crimp sleeves.
2. Follow connector manufacturer
installation instructions for wire strip
length and pre-twisting of wires
3. Insert crimp sleeve.
4. Squeeze handles until connector is
fully compressed and secured to wires
5. Release handles to remove
crimped connector
6. Trim and cut flush any
excess wire from splice as required
