- A. VERSATILE TAP DESIGN**
Tap is threaded to handle 90° Elbow, Straight Barb, or appropriate sprinkler heads.
- B. ERGONOMIC HURRICANE HANDLE**
With **50% MORE SURFACE AREA** to cushion fingers and provide maximum comfort.
- C. FAST THREAD**
Short thread design allows for the quickest and easiest installation possible.
- D. IMPROVED CUTTING TIP**
Superior strength patented "cutting tip" cleanly cuts polyethylene pipe for a tight seal every time.
- E. SIDE SNAP LATCH**
Side location for visible, secure connection.
- F. WORKING HEIGHT**
Shorter working height than competitive products, requires less digging.
- G. ADJUSTABLE STRAP**
Universal strap provides an adjustable, snug fit on the pipe

SnapTap® Saddles

INSTALLATION INSTRUCTIONS

Note: Do not install tap into saddle until saddle is in place on pipe.

SLIP saddle onto pipe, pipe size doesn't matter.

SLIDE the strap into guide on the latch.

SNAP the strap through the latch until snug with pipe or there are no more clicks.

Screw **TAP** into saddle until the tap locks. Handle will be parallel to pipe.

- Side snap latch provides a visible, secure connection
- Fits 3/4", 1" & 1 1/4" Poly Pipe
- Easy Installation, no fittings, or no clamps
- Available with a 90° elbow or straight barb fitting
- Ergonomic hurricane handle provides comfortable, quick rotations
- Short thread design allows for the quickest, easiest installation possible
- Cutting tip cleanly penetrates and cuts for a tight seal everytime
- Universal strap provides an adjustable, snug fit on the pipe
