

Self-Igniting Torch

KT4000

The nVent KING INNOVATION Self-Igniting Torch is designed for heavy applications including soldering, brazing, heat treating, and more.

- Features a swirl flame that provides hot, efficient heating and fast soldering times
- Instant on/off trigger for easy ignition and a lock button for continuous use
- Fuel: Compatible with Propane or MAP-Pro
- Auto start/stop ignition, instant cut off, and auto flame lock to keep the torch lit for finger-free use
- Provides stable flame for consistent performance even when used inverted
- Quick-light torch with advanced control system to easily adjust the size of the flame for different applications
- Max Temperature: 2,669° F (1,465° C)
